The Premier Choice in Projector Technology and Application Versatility.

The Hitachi Advantage

A sampling of the many advanced features incorporated into select Hitachi LCD projectors.

ImageCare Technology

ImageCare ImageCare is a lamp power control function that combines optimal picture performance with maximum energy savings by decreasing energy usage, improving contrast ratio and lengthening lamp life. The result is a lower total cost of ownership and decreased maintenance cost.

Intelligent Eco and Saver Modes

Automatically changes the brightness of the lamp according to the brightness level of the screen. Also, automatically changes the brightness of the lamp if there is no change in the screen image. Using ImageCare technology, these features give optimal picture performance with maximum energy savings.

Display via USB

Simply plug and play using the USB port instead of the 15 pin D-sub VGA cable.

PC-Less Presentation

By using a USB memory stick or other storage device, you can use the projector without a computer. Menus are easy to see with a thumbnail display. Additionally there is also a slideshow function.

Perfect Fit 2

Enables the user to adjust individual corners and sides independent of one another. Perfect Fit 2 provides vertical and horizontal digital correction of either barrel or pin cushion distortions. This feature helps correct geometric and complicated distortions. Perfect Fit 2 allows the projected image to fit correctly to the screen quickly and easily.

Interactive Hitachi's high performance interactive LCD projectors are designed to today's education and corporate environments. Boasting an extensive feature set which combines high resolution, high brightness and contrast ratio, long lamp life and proven reliability—all in a compact size chassis. Crisp, clear images are complemented with exceptional color accuracy.

Ultra Short Throw Ultra short throw projectors from Hitachi are designed to free users from the restraints of obstructive shadows or light shining in the presenters eyes. Small in size, but big on performance, Hitachi's ultra short throw projectors provide vibrant image quality, cost-effective operation, and long-lasting reliability with a low operating cost.

Short Throw Short throw projectors from Hitachi produce large images in limited spaces and provide smooth, seamless colors combined with an unparalleled grayscale range for bright, clear, true to life images in all environments. Designed for easy operation and maintenance, short throw projectors will provide years of versatile performance.

Portable When size and weight are critical, Hitachi's portable LCD projectors are the ideal solution for the person on-the-go. High resolution, high brightness, wireless capable, and HDMI connectivity, these small projectors pack a big time punch with a low operating cost.

Classroom and Conference Room From the classroom to the conference room, Hitachi's LCD projectors combine superior image clarity, high quality value and long-life reliability. Bright, vivid colors with razor-sharp text and bold graphics will truly enhance any lesson or meeting and make it more memorable. Further engage the audience by annotating over images with the optional TB-1 tablet and pen.

Collegiate Designed for larger rooms, lecture halls and auditoriums, Hitachi collegiate LCD projectors combine powerful capabilities with installer friendly features. Inorganic optics, a dust resistant design and a generous warranty make collegiate projectors ready for the long run. Whether presenting to students in school, or to a conference room full of clients, Hitachi has a collegiate projector to suit every need.

“Convenient and easy-to-use installation”

Installation Hitachi's installation LCD projectors bring large venue performance and superior networking connectivity to a variety of applications. They are designed to facilitate ceiling mounting in mid to large size spaces and incorporate a robust set of innovative, performance enhancing features that will leave any audience exhilarated and enthralled. Hitachi's installation projectors also offer superior reliability, advanced and flexible technology, and hassle-free maintenance.

Professional Hitachi's professional LCD projectors deliver on the company's trademark reliability, versatility and performance to the high end professional AV marketplace. Typical installations include auditoriums, lecture halls, large houses of worship and stage productions. With exceptional brightness and easily changeable bayonet style lens options, professional projectors from Hitachi offer the pinnacle in performance.

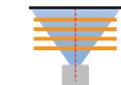

Wireless Presentation Ready

You can use a wireless network by connecting the projector to a computer using the optional USB wireless adapter part number USBWL11N. The adapter supports IEEE802.11b/g and the latest 11n.

Center Lens Design

This feature makes it easy to align the projector with the center of the screen for faster and trouble-free setup.

Motorized Zoom, Focus and Lens Shift Control

Allows for greater range of installation possibilities. With the motorized function you can make fine adjustments through the remote control or RS232/IP device.
